

Chlorine Free

RubiCLEAR
POOL TREATMENT IS HERE.

A GLOBAL BREAKTHROUGH IN
ENVIRONMENTALLY FRIENDLY SWIMMING POOL
TREATMENT THAT IS HARMLESS TO HUMANS

100% Kills E.coli

100% Kills Cholera

100% Odourless

100% Tasteless

RUBICLEAR

Has the ability to substitute all of these pool products

*For an optimum pool dosage equation, a pool site inspection is required.

Supplied in buckets.

THE FACTS

The RubiCLEAR granular is free-flowing, soluble in water, and contains no chlorine or halogens.

Inorganic salts are used to make this proprietary blend, which works as a powerful oxidiser, a DISINFECTANT and has unique algaecide properties.

RubiCLEAR is much safer than chlorine when it comes to the destruction of spores, bacteria, viruses, fungi and other pathogens; it also destroys phenols that are immune to chlorination.

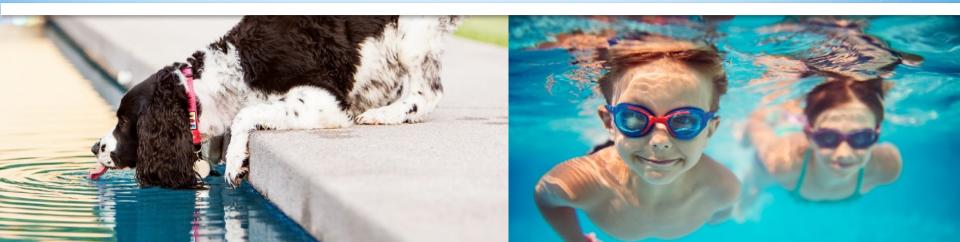

Unlike other disinfection by-products (DBP's), RubiCLEAR does not produce THM's (Trihalomethanes) or HAA's (Haloacetic Acid), nor is it affected by photo-decomposition, temperature, or atmospheric conditions when applied.

There is a long residual life span for RubiCLEAR, and it is easy to dose and control

The primary products of RubiCLEAR reduction are OXYGEN and WATER, making it one of the safest disinfectant products in the world.

WATER DISINFECTED BY RubiCLEAR TO BE FIT FOR HUMAN CONSUMPTION. (and pets too!)

THE FACTS

UNIQUE CHARACTERISTICS:

- Odourless
- Fast dissolving
- Environmentally friendly
- A powerful oxidiser and sanitiser
- Oxygen-based (containing no chlorine)
- Safe, harmless, tasteless, and non-toxic
- Un-effected by UV degradation or any atmospheric conditions such as thunderstorms, excessive rain etc.
- No fatal THM's, HAA's, MX, or DCA's can be produced

Chlorine Free

100% Kills Cholera

100% Odourless

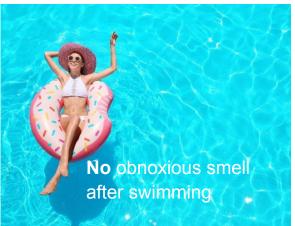

100% Tasteless

BENEFITS

Ensure normal pool maintenance schedule is followed;

- Backwash pool properly
- Ensure pH is between 7.4 7.6
- 1ppm chlorine concentration
- Chlorine at 1ppm only during high usage of pool
- Pour product around the edges of the pool into the water every week
- Less active pools last more than 8 weeks.
- RubiCLEAR pool water can be discharged onto the lawn
- Enjoy a sparkling clear pool

RATIO

During High Season - Weekly 120g per 10,000L

or

Off Season - Every 60 to 90 Days 600g per 50,000L
